Message from Attorney General Eric Schmitt

As the chief lawyer for the State of Missouri, my job is to protect each and every one of our six million citizens from crime, abuse and fraud, a responsibility I take very seriously. Our government, the shared responsibility between the citizens of our state and the elected officials, must be a framework that preserves all citizens' rights to life, liberty and pursuit of happiness.

The office of the Missouri Attorney General is required, by law, to collect data on the demographics of the traffic stops made by law enforcement officers from across the state, and to report these findings to the Governor and the public. Importantly, this data can help government and law enforcement determine any issues with disparities related to stops and searches.

This report aggregates the traffic stops data from 571 law enforcement agencies across the state, breaking down the data as it relates to race, the number of stops, the search rate, contraband hit rate and arrest rates. In 2019, we identified several changes to questions that officers must answer when making a stop that we believe will make next year's report more informative. This includes questions relating to the officer's assignment, the residential zip code of the driver stopped and the reason for issuing a citation or warning. This data will provide more context for the data collected and be fully available in the 2021 report.

As we seek to balance the rights of all citizens of our state with the enforcement of the rule of law, and the brave men and women of law enforcement who put their lives on the line every day to protect us, we will continue to improve this report.

Eric Schmitt
Attorney General

Background

Concerns by the citizens of Missouri and the Missouri legislature regarding allegations of bias in traffic enforcement prompted the passage of SB 1053 (2000). SB 1053 created section 590.650, RSMo. which became effective August 28, 2000. This statute created the Vehicle Stops Report and required that the Attorney General's Office collect and report on traffic stops conducted by law enforcement officers across the state of Missouri on an annual basis.

Under § 590.650, RSMo. all peace officers in the state must report specific information, including a driver's race, for each vehicle stop made in the state. Law enforcement agencies must provide their vehicle stops data to the Attorney General by March 1, and the Attorney General must compile the data and report to the Governor, General Assembly, and each law enforcement agency no later than June 1 of each year. The law allows the Governor to withhold state funds for any agency that does not submit its vehicle stops data to the Attorney General by the statutory deadline.

After reviewing analysis of the Vehicle Stops Report (VSR) and conferring with law enforcement leaders across the state in 2019, the Attorney General's Office (AGO) began implementing comprehensive changes to the VSR. These changes will improve the information collected for the report while allowing for a fundamental shift in the level of analysis possible through the VSR. Three new questions have been added to the report that collect information on officer assignment during the stop, the residential zip code of the stopped driver, and the cause of citations and/or warnings issued to the driver. In addition, other questions have been adjusted for clarity or to improve the value of the data they collect by adding new response options.

The most significant change to the VSR is its shift toward collecting disaggregated data from across the state. Currently, agencies only report the aggregate numbers of stops meeting the criteria for each question broken down only by race, for example 200 searches of Hispanic drivers over the course of the year. This reporting framework prevents multi-variate analysis with variables such as driver age, driver sex, and time of stop that could significantly improve VSR analysis. To correct this, the AGO is moving to implement an optional data collection framework that collects all variables for each stop an agency made during the year. These changes became effective January 2020 and implementation efforts across the state are ongoing. The benefits of these changes will be fully realized by the 2021 report.

The summary of statewide vehicle stops data has been provided by Dr. Scott H. Decker, Foundation Professor Emeritus in the School of Criminology and Criminal Justice at Arizona State University; Dr. Richard Rosenfeld, Curators' Distinguished Professor Emeritus in the Department of Criminology and Criminal Justice at the University of Missouri-St. Louis; and Dr. Jeff Rojek, associate professor in the School of Criminal Justice and Director of the Center for Anti-Counterfeiting and Product Protection at Michigan State University.

Statewide Metrics

This report summarizes traffic stop data from 571 law enforcement agencies in Missouri for calendar year 2019. An additional 29 agencies indicated they made no traffic stops during the year. These agencies often contract out traffic enforcement to another agency covering their jurisdiction and focus on other enforcement activities. In total, this report represents 96.3% of the 623 active law enforcement agencies in the state.

The agencies filing reports recorded a total of 1,524,640 vehicle stops, resulting in 102,755 searches and 74,553 arrests. Table 1 breaks out the stops, searches and arrests by race and ethnic group. Four summary metrics are included in Table 1 that may be useful in assessing bias in traffic enforcement.

When assessing these four metrics and the auxiliary statistics alongside them, the concept of discretion is an important consideration. For bias to influence the decisions of law enforcement officers, they must have some discretion in the action they take. If officers only have one course of action in a given situation, there is little room for bias to influence their decisions without breaking from procedure or statute, therefore, caution should be used in attributing bias.

An example of this is when a driver who has been stopped has an outstanding warrant for his or her arrest. In this situation, an officer must arrest and then search that driver. If outstanding warrants become concentrated in a racial/ethnic group in an agency's jurisdiction, this may result in the appearance of a disparity in arrest rates when officers had no discretion in their actions, which therefore were not affected by bias. Analysis of the degree of discretion that officers have in various situations is vital for a complete understanding of this report.

2019 Statewide Summary of Results

Key indicators	Total	White	Black	Hispanic	Asian	Am. Indian	Other
16+ population	4,730,501	3,914,998	515,828	139,109	80,677	19,168	60,721
Stops	1,524,640	1,161,680	297,608	35,421	14,082	2,051	13,798
Searches	102,755	72,387	26,371	2,940	399	119	539
Arrests	74,553	52,873	18,472	2,244	329	96	539
2010 Statewide population %	100.00%	82.76	10.90	2.94	1.71	0.41	1.28
2010 Disparity index	---	.92	1.79	.79	.54	.33	.71
2018 Estimated statewide population %	---	80.42	10.98	3.38	2.03	.46	2.73
2018 Disparity index	---	.95	1.78	.69	.46	.29	.33
Search rate	6.74	6.23	8.86	8.30	2.83	5.80	3.91
Contraband hit rate	35.37	35.93	34.93	28.37	27.82	24.37	28.76
Arrest rate	4.89	4.55	6.21	6.34	2.34	4.68	3.91

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. The 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for Whites, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if a jurisdiction has a small non-White Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation; values less than 1 indicate under-representation.

Search rate = (searches / stops) x 100.
Contraband hit rate = (searches with contraband found / total searches) x 100.
Arrest rate = (arrest / stops) x 100.

Disparity Index

The first summary metric is the "disparity index" and it relates each racial/ethnic group's proportion of total traffic stops to its proportion of the driving-age (16+) population. A value of 1 indicates that a group's proportion of vehicle stops equals its population proportion: it is neither "under-represented" nor "over-represented." Values above 1 indicate over-representation, and those below 1 indicate under-representation in traffic stops.

There are several reasons that traffic stops may not be proportionate to the racial/ethnic composition of a jurisdiction. These reasons often overlap and identifying the magnitude of each reason's effect or separating them from each other is beyond the capability of this report or its underlying data. The four major sources of disparity identified by scholars are: *

- *Policing strategies and policies:* Law enforcement officials make strategic choices on where and when to police that may disproportionately impact various racial/ethnic groups. These strategies may be as simple as concentrating patrols in areas within a city with higher crime rates, but could lead to a disproportionate impact if that area has a higher concentration of a racial/ethnic group than the jurisdiction as a whole.
- *Differences in real rates of offending between racial/ethnic groups:* The correlation of dynamics such as economic or social disadvantage with race or ethnicity may lead to differences in rates of real offending. If there are real differences in offending rates, traffic stops should theoretically increase or decrease accordingly.
- *Implicit bias:* Subconscious or unconscious biases that can influence the decisions and perceptions of individuals. Implicit bias can be difficult to detect, even for the individual operating under its influence.
- *Explicit bias:* Overt, conscious bias toward a specific group.

In 2019, the 1,161,680 whites who were stopped accounted for 76.2% of all vehicle stops. Whites comprise an estimated 82.8% of Missouri's driving age population. Therefore, the value for whites on the disparity index is .92 (.762/.828). Blacks represent 10.9% of Missouri's driving-age population but 19.5% of all vehicle stops, for a disparity index of 1.79.

Hispanics (0.79), Asians (0.54), American Indians (0.33), and persons of mixed or unknown race (0.71) were stopped at rates well below an expectation based upon their portion of the driving-age population.

The values on the disparity index for the different groups can be compared directly to one another by dividing their values. For example, the likelihood that a Hispanic motorist was stopped is 1.46 times that of an Asian motorist (.79/.54).

Limitations

The disparity index relies upon a benchmark to set the expected rate at which members of a racial/ethnic group should be stopped. The actual rate of stops is then compared against this benchmark to calculate the disparity index. The 2019 Vehicle Stops Report uses the racial/ethnic portions of the driving-age (16+) 2010 Census populations of each jurisdiction for its benchmarks. This is an imperfect benchmark as a person does not need to live in an area to drive through

* Lum, C., and Wu, X. (2017). Basic Analysis of Traffic Citation Data for the Alexandria Police Department (2011-2015). Fairfax, VA: Center for Evidence-Based Crime Policy, George Mason University.

it and a person may not drive despite being old enough to legally do so. This dynamic can lead to the racial/ethnic makeup of drivers on a jurisdiction's roadways differing from that of its residential population. The extremely low disparity index value for American Indians, for example, could indicate that they are under-represented among the state's motorists. In addition, the benchmark population figures are nine years older than the vehicle stops data they are compared to. The age of these estimates may lead to some jurisdictions' population estimates differing significantly from their current values.

To minimize the distortion of the disparity index caused by the use of nine year-old population benchmarks, this year's report uses population estimates from the 5-year American Community Survey (ACS) covering 2014 – 2018. However, the 2010 Census populations are the "default" estimate as the breakdown in reporting of racial/ethnic groups in the ACS is more limited than the Census. To generate the typical Census-based disparity indexes, each group's benchmark population only includes non-Hispanic individuals and all Hispanic individuals are placed in the Hispanic category. However, the ACS only reports non-Hispanic population totals for whites, meaning it is impossible to separate Hispanic individuals from non-White populations for the purposes of calculating the disparity index. This results in non-White Hispanic individuals being double counted in the 2018 ACS disparity index calculations, once in their racial group and once in the Hispanic group.

Analysis of the 2010 Census data found that 61% of Missouri's Hispanic population was White, while 34% would fall into the "Other" category of this report which consists of those reporting "Other" or two or more races. This means that the distortion in the benchmark population for non-White races is limited across the state, though it is possible calculations for jurisdictions with larger non-White Hispanic populations could be distorted to a greater degree. The 2018 ACS disparity indexes should be viewed as supplemental information for analyzing traffic stop disproportions.

Appendices to this report can provide useful analysis to partially alleviate these issues. Appendix A uses statewide rather than local racial/ethnic population portions to generate disparity index calculations, reducing the impact of the residency issue. Appendix C makes use of the residency question added to the Vehicle Stops Report form for the 2019 reporting cycle to only use traffic stops of residents of an agency's jurisdiction when generating the disparity index. This allows an analyst to control for driver residency when examining an agency's report.

Search Rate

A second metric that can be used to assess traffic enforcement is the "search rate," or the number of searches divided by the number of stops (x 100). Searches include both searches of drivers and searches of the vehicle and property within.

The search rate for all motorists who were stopped in 2019 was 6.74%. Asians were searched at a rate well below the statewide average (2.83%), while Blacks (8.86%) and Hispanics (8.30%) were searched at rates above the average for all motorists who were stopped. Whites were searched at a rate below the state average at 6.23%. The search rate for racial/ethnic groups can also be directly compared with one another. Hispanic drivers were 2.93 times more likely to be searched than Asian drivers (8.30/2.93).

Limitations

The reasons for conducting a search and the outcome of the search (i.e. discovery of contraband) should be considered when making comparisons across groups. Some searches are conducted with the consent of the driver, or because the officer observed suspected contraband in plain view, had reasonable suspicion that an individual may possess a weapon (Terry search), or other reasons. These searches may or may not result in an arrest.

Other searches are conducted incident to arrest—this means that there is no other reason given for the search other than arrest. As mentioned above, searches are almost always performed when there is an outstanding arrest warrant, whether or not contraband may be present.

It is notable that the search rate, along with the other post-stop metrics, are not subject to the benchmarking issues that affect the stop disparity index. The benchmarks for the post-stop metrics are the number of stops reported, so no estimation is involved in their calculation.

Contraband Hit Rate

The third summary metric, the "contraband hit rate," reflects the percentage of searches in which contraband is found. Contraband was found in 35.4% of all searches conducted in 2019. Little difference exists in the contraband hit rate for searches of White and Black drivers (35.9% vs. 34.9%). The contraband hit rate for other groups is somewhat lower. For example, searches of Hispanic drivers resulted in a contraband hit rate of 28.4%. This means that, on average, searches of White and Black drivers are more likely than searches of Hispanics to result in the discovery of contraband.

Limitations

While the contraband hit rate is not subject to benchmark issues, the degree of discretion officers have in their searches should still be considered when examining contraband hit rates. The difference in contraband hit rates among racial/ethnic groups may result in part from the higher arrest rates for Blacks and Hispanics—if there is an arrest, there will be a search whether or not the arresting officer suspects the subject has contraband. This may deflate the contraband hit rate since searches are required by standard procedure rather than suspicion of contraband.

Arrest Rate

The "arrest rate" is the fourth summary metric included in Table 1 that may be useful for assessing bias in traffic enforcement. Statewide, 4.89% of all traffic stops resulted in an arrest (74,553/1,524,640).

Approximately 6.21% of the stops of Blacks and 6.34% of the stops of Hispanics resulted in arrest, compared with about 4.55% of the stops of whites. Asians (2.34%), American Indians (4.68%), and people of mixed or unknown race (3.91%) had lower arrest rates than whites. The dynamic of Blacks and Hispanics being arrested at a higher rate likely impacts search and contraband hit rates as described above.

Limitations

Like the other post-stop metrics, the arrest rate does not suffer from benchmark issues, however, limited officer discretion should still be considered as described above.

Conclusion

Missouri is a vast and complex state at the crossroads of the country. Each of its communities is unique and presents many dynamics that must be comprehensively evaluated when assessing the possibility of bias in traffic enforcement. Each agency's report should be read in conjunction with its entries in each of the appendices, reports for prior years, and in the context of the dynamics of the community it serves. This report is subject to limitations as described above and simply aims to provide a starting point for local dialogue.

Appendices

Appendix A: Local Vehicle Stops in Proportion to State Racial Composition

Appendix A presents the traffic stop analysis using the statewide proportions of race and ethnicity, rather than the local proportions of each jurisdiction. This is valuable as it reduces the impact of the residency benchmark issue on the disparity index of each agency.

Appendix B: Disparity Indexes for 2000-2019 Compared

Appendix B compares the 2019 disparity index to the disparity indexes for 2000 through 2018. For each agency, the disparity index for each race-ethnic group is presented for 2000-2019. For the state as a whole, the key metrics generally show small changes between 2016 and 2018.

Appendix C: Resident and Non-Resident Stops

Appendix C displays the number and percentage of traffic stops of residents of the jurisdiction where the stop occurred separately from the total number of stops (i.e., stops of residents + stops of nonresidents). Disparity Indexes for the different population groups are also shown.

Appendix C uses the addition of the driver residency question in the 2018 reporting cycle to provide a disparity index calculated using only traffic stops of drivers who reside in the agency's jurisdiction. Readers should acknowledge that a driver's residency may not accurately reflect where the driver spends the majority of their time. Many Missourians commute from one community to another for work and leisure, so the demographics of drivers on the road may not reflect those living in the community. By restricting the calculation to only those drivers who reside in a community, the calculation may include drivers who spend the majority of their time in another jurisdiction while excluding those who commute into the jurisdiction for the majority of the day.

2019 Vehicle Stops Report
Table of Contents

Accuracy Verification: The Attorney General's Office made extensive efforts to verify and correct all forms where numbers appeared incomplete or inaccurate. To the extent that corrections could be determined, they were incorporated into the report. In addition, all agencies were given the opportunity to review their final reports before publication and to make comments. At that point, corrections again were made for agencies and their comments have been included on individual city data sheets under the heading "Agency response."

Statewide population %	N/A	82.76	10.90	2.94	1.71	0.41	1.28
2010 Local population %	N/A	92.95	1.61	1.92	1.98	0.25	1.29
2010 Pop. Disparity Index	N/A	0.95	3.36	2.04	0.53	0.60	0.82
2018 Local population %	N/A	90.22	3.77	0.93	2.87	0.24	1.97
2018 Pop. Disparity Index	N/A	0.98	1.44	4.23	0.37	0.62	0.54
Search rate	1.36	1.53	0.00	0.00	0.00	0.00	0.00
Contraband hit rate	22.22	22.22	#Num!	#Num!	#Num!	#Num!	#Num!
Arrest rate	0.90	1.02	0.00	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	5.47	5.29	16.67	0.00	#Num!	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	3.29	3.47	0.00	0.00	#Num!	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	5.00	5.00	#Num!	#Num!	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The only alarming percentage is the 22.22 percent search rate of blacks vs 6.48 percent for whites. This is simply a result of having only 9 stops for blacks with 2 searches being conducted. When you look at the reports for those stops and searches, they are completely valid and justified. There are no issues, however it is something that could generate a question if looking at percentage numbers only.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	22.30	18.75	#Num!	38.46	57.14	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

2018 Pop. Disparity Index	N/A	1.07	2.86	0.37	0.55		0.19
Search rate	3.54	3.03	15.15	0.00	0.00	#Num!	11.11
Contraband hit rate	57.14	68.18	20.00	#Num!	#Num!	#Num!	0.00
Arrest rate	1.89	1.52	9.09	0.00	0.00	#Num!	11.11

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	1.30	0.67	1.61	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Searches	16	3	12	1	0	0	0
Arrests	20	3	17	0	0	0	0
Statewide population %	N/A	82.76	10.90	2.94	1.71	0.41	1.28
2010 Local population %	N/A	15.65	79.38	2.98	0.50	0.27	1.23
2010 Pop. Disparity Index	N/A	1.12	0.98	0.23	0.65	1.97	2.41
2018 Local population %	N/A	18.80	78.72	1.70	0.00	0.00	0.78
2018 Pop. Disparity Index	N/A	0.93	0.99	0.41			3.80
Search rate	0.86	0.92	0.83	7.69	0.00	0.00	0.00
Contraband hit rate	31.25	33.33	33.33	0.00	#Num!	#Num!	#Num!
Arrest rate	1.07	0.92	1.17	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	4.16	4.52	0.00	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The city of Bismarck contains Missouri Highway 32, which serves as a major thoroughfare for recreational, commercial and commuting traffic from south central Missouri. Bismarck, as well as Highway 32 is geographically located along the boarders of St. Francois, Iron, and Washington counties, and as such, sees an increased number of workforce commuters to and from the St. Louis Metropolitan area. Additionally, the mining industry of southeast Missouri, accounts for a high volume of commercial traffic along Highway 32. Our agency increased commercial vehicle enforcement as such. Bismarck, is a common stop along Highway 32, which is the main artery to many state parks, rivers, and recreational areas which are in close proximity. This main route, accounts for an influx of traffic, with drivers from out of the area, as well as out of state. Lastly, 2019 was the first year in recent history, in which the Bismarck Police Department was able to maintain an adequate staffing level for the entire year. The aforementioned factors, undoubtedly accounted for an increased number of traffic stops as well as a more diverse range of drivers stopped than would be reflected in the dynamic of the local population.

2018 Local population %	N/A	82.91	6.82	4.47	2.33	0.45	3.03
2018 Pop. Disparity Index	N/A	0.97	2.26	0.50	0.39	0.07	0.28
Search rate	5.36	4.64	9.55	4.90	0.00	0.00	5.45
Contraband hit rate	38.73	37.34	42.11	28.57	#Num!	#Num!	66.67
Arrest rate	5.04	4.21	9.25	6.99	1.72	0.00	5.45

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The City of Blue Springs is located in The Kansas City Metropolitan area along Interstate 70 and US 40 Highways. This route is heavily traveled between Kansas City and St. Louis with both in State and out of State travelers. Within the City, and in close proximity to the Interstate 70 corridor, are many restaurants and retail businesses to include a large shopping complex at Interstate 70 and Adams Dairy Parkway. In addition, the Blue Springs School District attracts a large number of students and visitors who are not actual residents of the City. These daily travelers greatly affect the population levels outside of those reflected in the State population estimates of drivers 16 and over, which in turn has an impact on the disparity index. The City of Blue Springs has made a strong commitment to protect citizens, both residents and non-residents, from racial or bias based profiling. In addition to the mandatory annual Racial Profiling training required by the State of Missouri, the members of the Blue Springs Police Department, both sworn and civilian, have been given additional POST certified training in this area. In 2019 the Anti-Defamation League conducted Bias Free Policing for all sworn officers and some civilian staff. The Blue Springs Police Department brings in a guest instructor of this nature annually, and will do so again in 2020. The Police Department also invites members of the Human Relations Commission to attend those trainings with officers and staff.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Boone County's population is growing rapidly, experiencing an increase of over 9% since the 2010 census. U.S. Census Bureau data as of July 2019 (2020 data not available), estimates Boone County's population at 180,463. Boone is one of the fastest growing counties, and Columbia is now the 4th largest city in Missouri. The City of Columbia is the metropolitan center of Boone County and is the home to the state's flagship university, two other smaller colleges and many satellite college campuses. Columbia is the regional hub for employment in the education, medical (5 hospitals), insurance and manufacturing industries. Columbia also hosts multiple shopping, sporting and entertainment venues which draw visitors from all over the country. Boone County has the convergence of two major highways (Interstate 70 and U.S. Highway 63), and its population is greater during the day than at any other time with commuting workers.

Arrest rate	5.54	4.60	19.44	0.00	0.00	33.33	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Branson West has a very unique situation and that is we are in a tourist area located in the center of Stone County at the intersection of MO 13 and MO 76, which is the route's used to both access Table Rock Lake to the south and to the east is Silver Dollar City. The population of our city is just over 400, but is not uncommon to have over 20,000 a day passing through. This certainly plays a big part in the results we see.

Arrest rate	0.96	1.48	0.34	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The City of Bridgeton is located near Lambert Airport and consists of a small residential population. There are three major interstate highways; namely, 70, 270 and 370 that run through the City. Also, US highway 67 (Lindbergh), St. Charles Rock Road and Natural Bridge Road are major thoroughfares which also run through the City of Bridgeton. There is a large transient population and work force with many hotels and large industrial employers within Bridgeton's boundaries.

2010 Local population %	N/A	88.11	5.09	4.30	0.92	0.37	1.22
2010 Pop. Disparity Index	N/A	1.01	1.24	0.63	0.69	0.38	1.20
2018 Local population %	N/A	83.37	5.63	5.50	1.19	0.39	3.92
2018 Pop. Disparity Index	N/A	1.06	1.12	0.49	0.53	0.36	0.38
Search rate	6.35	5.97	11.11	10.39	11.11	0.00	0.00
Contraband hit rate	45.86	43.71	60.00	37.50	100.00	#Num!	#Num!
Arrest rate	3.68	3.40	7.22	7.79	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	5.38	5.69	0.00	0.00	#Num!	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Search rate	12.50	14.29	#Num!	0.00	#Num!	#Num!	#Num!
Contraband hit rate	100.00	100.00	#Num!	#Num!	#Num!	#Num!	#Num!
Arrest rate	12.50	14.29	#Num!	0.00	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Cape Girardeau County is the largest population center in Southeast Missouri. Interstate 55 runs through Cape Girardeau County. Motorist from all over the state and country travel thru our jurisdiction daily. Cape Girardeau City resides in Cape Girardeau County which is the largest city between St. Louis, MO to the north and Memphis, TN to the south. Travelers come to Cape Girardeau County to shop, school, recreation and work opportunities. We sit on the Mississippi River joined to Illinois by the Emerson Memorial Bridge that also brings many travelers to our area for shopping, school, recreation and work. Southeast Missouri State University and its diverse population of students is located within Cape Girardeau County. A large number of these students are from other states and countries that have moved to Cape to attend school. A large portion of the student body at Southeast Missouri commute to school daily from all over Southeast Missouri and Illinois. We have two major hospitals in Cape Girardeau, one being a major trauma center, that handle patients from all over Southeast Missouri and Illinois and brings many visitors and family to the medical capabilities of these hospitals.

The traffic stop data for the Carl Junction Police Department shows a disparity rate under the "Black" heading of 6.59. I believe this is a misleading number and the reasons behind this are multiple. The City of Carl Junction has grown greatly since the last census in 2010 and I don't believe that the .80 that has been listed in the "Black" population column is valid in our community. The second part of this is that the majority of these stops were made on MO. State Highway 171. Highway 171 is the major thoroughfare between Southeast Kansas and Southwest Missouri. There are also two State Universities in the area with travel between these schools made daily and the largest percentage of the stops are in the college age group. I believe the traffic travelling through town population is probably more in line with the State population, along with matching the cultural differences in your headings.I believe there is an assumption that the officers know the race of the driver of the vehicle before it is stopped in your data collection. The truth is there is an average 13.5 hours of daylight during the year, it is very difficult, if not impossible to tell the race of drivers during night time hours, and it is my observation that it is not always possible to determine the race of a driver before a traffic stop during daylight hours. There is a 'time of stop" space on the traffic stop data sheet, but it is not asked for on the report. I would ask that time of stop be included on the data collection.
There were 48 total stops of African American drivers in 12 months. That is an average of 4 per month. I have no reason to believe that any of these stops were racially motivated.

Arrest rate	10.20	10.31	#Num!	#Num!	#Num!	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrests	190	163	17	6	2	1	1
Statewide population %	N/A	82.76	10.90	2.94	1.71	0.41	1.28
2010 Local population %	N/A	91.19	3.17	3.25	0.68	0.51	1.20
2010 Pop. Disparity Index	N/A	0.99	2.08	0.57	0.44	0.33	1.03
2018 Local population %	N/A	88.91	3.62	3.54	0.81	0.68	2.44
2018 Pop. Disparity Index	N/A	1.01	1.82	0.53	0.37	0.25	0.50
Search rate	14.02	13.34	22.22	19.64	22.22	20.00	8.11
Contraband hit rate	43.94	45.00	36.36	27.27	50.00	0.00	100.00
Arrest rate	6.33	6.04	8.59	10.71	22.22	20.00	2.70

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Centralia is a pass through for quite a lot of traffic into and out of the Centralia City Limits. According to traffic counts Highway 22 has approx. 5148 vehicles, Highway 124, 5954 vehicles and Route Z 3378 vehicles, these are all daily numbers based upon traffic counts in 2016 conducted by MODOT. Traffic stops are determined upon the driving population not the residential population of the city. With the disparity index figured as it is now and with our black population dropping from 1.04% to .06% the numbers are going to swing dramatically. If you look at true numbers the police department conducted a total of 1745 traffic stops in 2019 and 102 of them were of black motorists, that is .06% of the stops were black a small percentage of total traffic stops. In closing it should also be said that the driving population is a very difficult number to measure and do not believe there is a way to determine what that number would be.

Arrest rate	2.09	2.14	0.00	#Num!	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

The Chesterfield Police Department strictly prohibits any and all forms of biased policing (racial profiling) by its personnel. This prohibition of bias policing practices applies to all encounters between police officers and citizens including arrests, traffic contacts, suspicious vehicle stops, field contacts, investigative detentions, consensual inquiries and forfeiture efforts. In addition to providing "Traffic Analysis" data to the Missouri Attorney General's Office annually, meeting all state statute requirements, the department has implemented a number of safeguards in order to prevent and or detect any possible signs of biased policing. The department utilizes monthly Quality Service Evaluations (QSE); randomly choosing sixty individuals who had contact with the agency's personnel each month and mailing them survey forms regarding the quality of services received. A more extensive citizen survey is mailed to every household in Chesterfield once every three years seeking similar input. The results of these surveys are closely scrutinized for possible indicators of biased policing practices. Annual training on biased based policing is provided to all commissioned personnel and a Citizens' Concerns memo is compiled quarterly and reviewed by command personnel for possible evidence of biased police practices. Another means of preventing and monitoring for biased policing practices is through the department's weekly in-car camera audits which are conducted by all supervisors in the Patrol, Traffic & Special Enforcement Units. Each officer in these units has a standard number of their vehicle stops randomly chosen and reviewed by their supervisors each month. The results of these audits are forward to the division commander for review. A similar audit of newly issued Body Worn Cameras is also in place. In addition to heading off possible racial profiling practices, these audits often lead to the discovery of equipment failures or potentially unsafe actions by officers and repairs or spot corrections can then be made. Current Missouri law caps traffic fine revenue at 20% of a municipality's budget. In Chesterfield for 2019, the total fines and court costs collected was $782,573, which is less than 2.1% of the City's overall budget, and that number includes all summons not just traffic fines. According to the 2019 Missouri Attorney General's Vehicle Stop data, Chesterfield officers stopped 15,104 vehicles; 78.97% of the drivers were White, 15.38% were Black, 3.36% were Asian; less than 1.4% were Hispanic. For comparison purposes, the City's population demographics are estimated to be 82.43% White, 3.73% Black, 10.07% Asian and 2.28% Hispanic. It should be noted that this data regarding the percentage of African-Americans living in Chesterfield may be somewhat deceiving as the day-time population of Chesterfield, in both numbers and racial/ethnic makeup, is considerably different than those portrayed by the latest Census

figures. Because Chesterfield is home to four major retails centers, numerous restaurants and a large light-industrial center, the numbers of African-Americans working, shopping and otherwise doing business within the city limits is likely much higher than is represented in the City's population. Additionally, Chesterfield has an interstate (I-64) and several large state and county roadways that intersect it and although the racial make-up of those traveling on these roadways is unknown, it is very unlikely that it would closely mirror the racial and ethnic makeup of the city's population. The Chesterfield Police Department is committed to investigating all complaints of biased policing and conducts an annual administrative review (see Biased Based Profiling Complaints table below), however no complaints of biased policing have been received in the past three years.

Arrest rate	3.00	2.79	6.00	3.45	33.33		0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

In an analysis of the Christian County Sheriff's Office 2019 Vehicle Stops Scores, several factors must be taken into consideration when determining if a race is over-represented in the disparity index scores. The current disparity index utilizes population benchmarks based on the 2010 Census. Christian County has experienced exponential growth in population since these benchmarks were established. The growth in population is due to a large influx of non-residents, which are more racially diverse than the 2010 Census population data. The population benchmarks do not reflect that Christian County is geographically located between two Missouri counties, which are both the annual destination of millions of tourists. These non-residents travel on the roadways to their destinations on the primary roadways within Christian County. Vehicle stops conducted on these primary roadways will predictably be operated by a non-resident and would be more racially diverse than the 2010 Census benchmarks. Christian County has an after-hours business, which is located on its northern border, which is predominantly visited by non-residents from the neighboring northern county. Law enforcement officers from Christian County proactively patrol this area during these hours to reduce an identified increase in criminal activity during these hours. These proactive patrols produce additional vehicle stops of the predominant non-residential motorist from a more racially diverse county.

Searches	42	36	6	0	0	0	0
Arrests	54	45	7	2	0	0	0
Statewide population %	N/A	82.76	10.90	2.94	1.71	0.41	1.28
2010 Local population %	N/A	98.12	0.21	0.44	0.30	0.12	0.80
2010 Pop. Disparity Index	N/A	0.91	31.26	6.96	0.00	1.55	0.48
2018 Local population %	N/A	97.31	0.42	0.24	0.11	0.44	1.48
2018 Pop. Disparity Index	N/A	0.92	15.71	12.89	0.00	0.44	0.26
Search rate	4.06	3.88	8.70	0.00	#Num!	0.00	0.00
Contraband hit rate	30.95	27.78	50.00	#Num!	#Num!	#Num!	#Num!
Arrest rate	5.22	4.85	10.14	6.25	#Num!	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	9.33	8.49	13.50	9.40	0.00	7.14	2.63

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

As the county seat, Clayton is home to St. Louis County's courts, Government Center, the Justice Center and many other social services. Clayton is also home to major corporations, two universities, and a destination for restaurant and retail businesses. As such, Clayton serves as a hub of economic, governmental, and education activity for the entire region, and it welcomes diverse visitors to the community on a daily basis. While this analysis is based on a residential population of 15,939 people (2010 census), Clayton is estimated to have a daily average population of roughly 46,000 people. For this reason, using Clayton's residential population or the State of Missouri's population to determine potential bias doesn't appear to be an appropriate method, as it does not consider the people working or visiting Clayton either in total numbers or in racial makeup. In tandem with these figures, social scientists say there are other factors which should be considered in attempting to determine potential bias. Among these are driving quantity, quality and location, all of which are legitimate factors for reviewing car stop data. Clayton officers receive annual training on the topics of racial profiling, implicit bias, and procedural justice. No complaints of alleged racial profiling were received in 2018.

Arrest rate	2.20	2.12	2.22	6.67	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	11.69	10.49	14.10	10.12	10.04	7.46	6.50

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Our community (Concordia Missouri) has many dynamics that might skew the results of your vehicle stops report. Concordia sits along I-70 which brings a large number of drivers from outside our jurisdiction passing through on a regular basis. We also have a meat processing plant (Tyson's Retail Deli), and other factories which employs a lot of people from outside our jurisdiction that would pass through on a regular basis.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The population number from 2010 is way below the current estimated population within our City to be near 6500 which the new census should validate.Secondly, an exorbitant increase in traffic that comes into our City via Hwy 364 and Hwy 94 wherein most of those travelers reside outside the city limits of Cottleville. It is only common sense that most of that traffic coming from the east comes from St Charles and St Louis County and would most likely differ from our majority citizen demographic population.

2010 Local population %	N/A	96.98	0.21	1.18	0.31	0.47	0.85
2010 Pop. Disparity Index	N/A	0.96	15.29	1.86	0.84	0.28	0.76
2018 Local population %	N/A	95.37	0.36	1.68	0.16	0.00	2.43
2018 Pop. Disparity Index	N/A	0.98	8.99	1.31	1.62		0.27
Search rate	9.33	9.00	8.00	23.53	0.00	0.00	20.00
Contraband hit rate	27.78	27.69	0.00	25.00	#Num!	#Num!	100.00
Arrest rate	4.02	4.16	0.00	0.00	0.00	0.00	20.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

State Highway 17 runs through the center of Crocker and is a major thoroughfare for those traveling from Pulaski County to Jefferson City and counties outside of our jurisdiction. Over 50 thousand vehicles pass through Crocker each year with approximately 90 percent being non-residents of the City. State Highway 17 also intersects with State Highway U within the city limits and is a major highway for those traveling to the Lake of The Ozarks. Fort Leonard Wood also presents a significant amount of through traffic for those traveling to Columbia and Jefferson and destinations beyond Pulaski County. We also run regularly scheduled saturation patrols on weekend and high traffic periods to promote highway and occupant.

Arrest rate	6.14	6.13	6.94	7.14	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

Arrest rate	1.07	1.09	1.44	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	13.20	13.05	10.00	16.67	0.00	#Num!	50.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

We have reviewed the traffic stop report for the City of Des Peres and feel the data collected can be uninformative and misleading to the community and region as a whole. The City of Des Peres is located at the intersection of Interstate 270 and Manchester Rd., long considered to be one of the busiest interchanges within the State of Missouri. In addition, our city has an extensive retail and commercial corridor anchored by a regional shopping center (West County Center), hospital and medical offices, retail centers, and a movie theater. These amenities and corridor bring visitors from all over the St. Louis County and bi-state region. The truly relevant data would be comparison of traffic stops with the racial diversity of drivers on all roadways within the city or based on the region population. Unfortunately, this data was not developed or referenced when reviewing each agencies data, and subsequent identified disparity index. In addition, the law requires a comparison between traffic stops and state population groups, not a comparison of stopped motorists and municipal population. The City of Des Peres and Des Peres Department of Public Safety is committed to just and unbiased administrative of the law. The Department of Public Safety does not engage in discriminatory practices and the City of Des Peres would not tolerate if it were to occur. Any reference to the contrary due to the data compiled for the Attorney General's report is unwarranted and erroneous.

2010 Pop. Disparity Index	N/A	0.97	16.33	0.60	0.41	0.00	0.12
2018 Local population %	N/A	96.43	0.02	1.67	0.00	0.00	1.88
2018 Pop. Disparity Index	N/A	0.97	367.18	0.58			0.07
Search rate	8.07	8.08	8.82	0.00	0.00	#Num!	33.33
Contraband hit rate	30.21	29.61	33.33	#Num!	#Num!	#Num!	100.00
Arrest rate	3.19	3.16	3.68	4.35	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	2.98	2.99	#Num!	0.00	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The City of Duenweg is a suburb of the City of Joplin and Duquesne MO. We are located about 3 miles east of both cities. A large portion of the traffic is a result of being closely located to these larger cities, the interstate and to a major University located within Joplin.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	12.56	8.33	14.15	19.15	0.00	#Num!	7.14

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The City of Eureka Police Department has found an error in the population number assigned to the Traffic Stop Data Report. 7,382 as stated on the top of the statistical page, is the population number from the 2000 census. As of the 2010 census, the City of Eureka had a population of 10,189. The City of Eureka is the home of Six Flags St. Louis one of the largest amusement parks in the State of Missouri. Six Flags brings visitors to our community from all over the country. Approximately 1.1 million persons visit Six Flags each year starting in March. The park recently modified their operating calendar and extended operating season through December 31st. This change was made to provide a family Christmas event of christmas lights, caroling, food and operation of selected rides. The yearly special event is called Christmas in the Park. Eureka Police Department has a deep respect for human rights, the constitution of the United States, and the law.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

To determine the disparity index, your office uses local population percentages (which is significantly aged data). For our department in 2019, over 53% of total stops were not residents of our local jurisdiction. To compare the local population percentages for the purpose of the disparity index is grossly misleading. Your formula assumes that only residents of our city operate vehicles in our city. The population of people traveling within our city has no direct correlation to our local population percentage. We are a tourism town with breweries, wineries, wedding venues and most notably, the Elms Resort and Spa, all of which welcome travelers and visitors of all races from areas all over the state. In addition, Excelsior Springs is home to a federal Job Corps education facility which proudly serves many inner-city populations, and has the capacity to hold over 400 students, which draws their families and friends to visit our community. To base a traffic stop analysis on a low local population percentage, when the local rates vary significantly from the state population percentages, is unreliable. The population percentages of the state should be used for the disparity index calculation, or even better, the data should be clearly separated for resident vs. non-resident stops. Using state population percentages that are more reflective of the motoring public would substantially change the disparity index and paint a more accurate picture.

The city of Fairview experienced a large number of traffic stops because of the following. The city hired a new officer back in August 2019, who working extended/ full time hours. Prior to that, the City's Officer presents were limited due to availability. Most of our drivers are from outside my jurisdiction passing through on a regular basis. Drivers passing through got used to not seeing an officer patrolling the highway and city limits. We have majority whites and majority males that commit moving violations because that's the larger number of the city's population. We also have a large number of drivers between 40 and over because these are the drivers that pass through on regular basis.

Arrest rate	0.00	0.00	0.00	0.00	#Num!	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	6.14	5.19	11.11	7.69	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	3.19	3.41	0.00	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

For the City of Galena the results are only from November 21, 2019 to December 31, 2019. Galena is a small community of approximately 400 people. The city has two state highways running through it and is a major thoroughfare for popular tourist attractions in Branson, MO and the Table Rock Lake area. The city was without city police coverage for the vast majority of 2019. One officer was hired on November 21, 2019, therefore resulting in a low number of traffic stops for the year and the large percentage of traffic stops of vehicles out of the local jurisdiction.

Arrest rate	3.48	3.20	12.50	20.00	#Num!	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

I have studied the summary of racial profiling data sent to me by your office for our police department for the year 2019. I believe there are a number of factors to be considered when analyzing this data and it must be placed in the proper context before drawing any conclusions. The City of Gladstone is characterized as an "inner tier" suburb in the Greater Kansas City Metropolitan area north of the Missouri River. In fact, our city is completely surrounded by the City of Kansas City and law enforcement agencies in this region are impacted by the same challenges found in most major cities in the United States. An interstate highway (Interstate 29) passes through the southern section of our city and a major highway (U.S.169 Highway) is situated a few hundred feet outside our west city limits. Both are major thoroughfares in the area that bring a significant amount of vehicular traffic into and through Gladstone daily. There are several apartment complexes located within the city limits of Kansas City immediately adjacent to the City of Gladstone. Several of these apartment complexes are accessible only by way of Gladstone city streets, generating significant motor vehicle traffic - including minority drivers - through Gladstone who are not reflected in the recorded demographics for the City of Gladstone. In addition, the City of Gladstone experiences considerable vehicular traffic that originates and/or terminates within Kansas City and/or the surrounding metropolitan area (both Missouri and Kansas). This is evidenced by an analysis of traffic accidents investigated by our agency. When examining the statistical data from the 434 accidents that were investigated by Gladstone Police for the calendar year 2019; the data reveals approximately 65% of the drivers involved in traffic accidents are non-residents of Gladstone. Gladstone residents account for about 31% of the drivers involved in traffic accidents. The Annual Report to the Attorney General for 2019 submitted by Gladstone Department of Public Safety reveals only 25.830% of the drivers of all traffic stops made by Gladstone police officers were residents of Gladstone. The combination of freeway access, being surrounded by Kansas City, the concentrations of minority tenants in apartment complexes proximal to Gladstone, the visitor traffic generated by these apartments, and traffic generated from outside our city, attracts a higher percentage of motorists - including minorities - than the proportion of the minority residents of the city would suggest in the data recorded. The traffic accident data and the report to the Missouri Attorney General on traffic stops clearly supports the conclusion the vast majority of the vehicular traffic in Gladstone is non-residents of the city and therefore the conclusions drawn by analyzing traffic stops is flawed when comparing the data against the recorded minority population living in Gladstone. In light of recent events focused on law enforcement and disparate

treatment of people of color in the United States, additional emphasis has been placed on educating our police officers. In addition to the annual online racial profiling training offered online through Police Legal Sciences (Biased-based Profiling/Racial Profiling/Fair & Impartial Policing) that meet the minimum requirements from Missouri Peace Officers Standards and Training (POST), all Gladstone officers are required to participate *in "De-Escalation Through Social Intelligence"* in 2019. This training was presented by an instructor with the Kansas City Metropolitan Community Colleges. In September 2019, all sworn Gladstone police officers were required to attend an eight-hour training course entitled *"2019 Contemporary Law Enforcement Challenges"* presented by Midwest Police Consultants, LLC. This course examined the concept of implicit bias and how the phenomenon can affect law enforcement. In addition, Gladstone officers are required to take online training courses from the city's liability insurance provider, Midwest Public Risk, on topics such as *"Racial Profiling," "Racial Profiling for Missouri," and "Working With Minority Communities."* Focused training on "bias awareness" for police officers is vitally important in creating an understanding of this subject and its impact on a community. Gladstone Department of Public Safety has established, and vigorously enforces, policies to ensure minorities are not disproportionately subjected to stops or arrests by our police officers. These policies are reinforced by active/involved supervision and training of our law enforcement personnel to ensure racial profiling and other discriminatory behavior does not occur in the department. Thank you for allowing me the opportunity to respond to the Attorney General's report to the Governor and General Assembly.

Arrest rate	0.81	0.90	0.00	0.00	0.00	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	4.30	4.13	6.94	4.65	2.76	0.00	0.67

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Community dynamics such as population disparities and the large number of major roadways through our county tends to skew data on our vehicle stop statistics. We have many transient drivers that travel through our county on our major roadways daily for work and pleasure (Branson being a major tourist destination to our south). The following are a list of highways and interstates that we patrol: Interstate I-44, US Highway 65, US Highway 160, US Highway 60, State Highway 123, State Highway 125, State Highway 744, State Highway 413, State Highway 13, State Highway 266, County Highway EE, County Highway MM, County Highway M, County Highway FF, County Highway FF, County Highway D, County Highway H.

Based on said report a disparity exists however, I think it is critical that several issues are addressed. The first being our close proximity to a major urban area and the amount of traffic that travels through our city. Secondly, I believe that we will see an increase in race population numbers in the coming census (2020). Finally, changes need to be made in the data collection in terms of “was race known prior to stop”. The majority of times officers stop a vehicle, they have no knowledge of who they are stopping. Our officers, during most stops, have no idea of the race of an individual being stopped until they make personal contact at the door of the violator’s vehicle. While these reports provide a fantastic opportunity to improve on policing and eliminating bias, they fall short of telling an accurate story of an agency’s activities.

Arrest rate	4.11	4.46	0.00	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	0.00	0.00	0.00	#Num!	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	13.66	14.14	13.64	6.25	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	3.68	3.42	28.57	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	7.21	7.28	7.14	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Hillsboro is the County seat of Jefferson County. Because of that, we have a very transient population which increases our daily population significantly. Our population swing is directly affected by the business in the courts and jail along with other County business Offices. Also, the County's only higher education facility, Jefferson College, is located in Hillsboro. This facility averages another 4,000 to 5,000 students annually on campus in recent years. These populations are often more diverse than our local community. Even still, I believe that the Hillsboro Police Department has had a fair and balanced approach in its traffic enforcement.

Arrest rate	1.27	1.36	0.00	0.00	0.00	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

In Howard County we have Central Methodist University with a large diversity of races that come from all over the U. S. and other countries. This gives an unrealistic numbers for the census statistics. Howard County also is a pass through county for the River Boat Casino in Boonville. Travelers come from the East and the North even the West Gamble at the Casino. Many time we have had different races and Nationalities travel through. These people do not live in Howard County and again is an unrealistic number of persons in the U. S. Census.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Independence is the fifth-largest city in Missouri, county seat and immediate suburb of Kansas City, with a population of 117,217. Ten major Interstates, highways and roadways allow direct access to the multiple racially diverse Kansas City metropolitan attractions located in the community; Harry S. Truman Presidential Library and historic home, Silverstein Eye Centers Arena , Super-Regional Independence Center Shopping Mall (2nd largest in KC Metro area with approximately 12 million annual visitors), 39th Street retail area, AMC 20 movie theater complex, Crysler Baseball Stadium, Community of Christ International Headquarters, colleges, community festivals, and multi-cultural dining venues. 50% off all traffic stops conducted by the Department involved residents from other jurisdictions. Significant traffic safety efforts are conducted along the major roadways and additional funding is provided for enforcement through state funded Hazardous Moving Violation grants, DWI Enforcement grants and Occupant Protection grants. 42.5% of the Department's total traffic stops in 2019 occurred during grant funded traffic safety enforcement. The City of Independence, 2019 disparity index for black, Hispanic and Asian drivers dropped after remaining fairly consistent over the previous five years. Black driver disproportions dropped from 4.92 in 2018 to 3.63 in 2019. The metropolitan attractions and thirty-one low income housing apartment complexes have influenced the racial composition of the motoring public to the community. The Independence Police Department is a professional law enforcement organization that is committed to impartial, competent, and courteous service to the public without regard to race, creed or gender. Officers receive annual training on cultural challenges and issues by ensuring and maintaining accountability in part through the integrity of the racial profiling documentation process in compliance with Missouri State Statute.

Arrest rate	10.87	10.99	#Num!	#Num!	#Num!	0.00	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The percentages of traffic stops related to minority populations can be deceiving, since our population of minority races within the county are so minimal, compared to the nation as a whole. Even minuscule variances in numbers regarding traffic stops of a particular minority race can increase or decrease the percentage drastically.
The percentages may also vary due to Jefferson County adjoining a more culturally diverse community within the St. Louis metropolitan area. Jefferson County also has a major interstate I-55 (southern mile marker 165 through northern mile marker 192) running the entire length of our county on the eastern border.
The formula currently used is based on traffic stops conducted on all motorists, compared to the residential census population of individual over the age of sixteen (16) within Jefferson County. This does not account for individuals stopped for traffic violations that are just traveling through the Jefferson County which reside elsewhere.
While conducting a computer inquiry through REJIS, I discovered of the 516 (2.94%) African American drivers that were stopped in 2019, only 208 (40.3%) reside in Jefferson County. Therefore, using the current formula;
Race of drivers stopped compared to population of that specific race that reside in the County of Jefferson, we are able to show (1.02%) African American drivers stopped
reside in Jefferson County.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	3.75	3.75	5.26	0.00	7.69	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Unlike the population in the cities and urban communities of Missouri, the Kansas City International Airport, as a business, sees a large diversity of people on any given day through its passengers, tenants and employees of the various businesses on the Airport property. There is the possibility that the reporting numbers may be slightly skewed due to this diverse population at the Airport, and may not reflect the populations of the communities around it.

Disparity indexes have not fluctuated significantly since the data collection began in 2000. However, these numbers should be interpreted cautiously. Specifically, relying on the census population for ages 16 and over as a benchmark does not provide a realistic picture of the driving population in Kansas City, Missouri at any given time. There are several major thoroughfares that run through the city, including I-29, I-35, and I-70 that contain a large percentage of drivers not reflected in the static census population used for comparison purposes. Additionally, Kansas City is contained within a metropolitan population of approximately 2.1 million, which adds to the commuter population on the major thoroughfares. When examining search rates, the probable cause/authority to search reasons should be considered. And when examining arrest rates, the arrest charges should be considered. By design, the form on which the AG Office submitted the summary report did not include the category Stop Outcome "Other", which was a factor involving 1,796 stops. Lastly, KCPD views vehicle stop data collection as one of many tools to address the issue of racial profiling. Other tools in use by the department include training, community programs, and policies.

Arrest rate	0.00	0.00	#Num!	#Num!	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	5.02	4.97	6.10	7.41	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Kirksville is home to two major universities whose enrollment data is not totally reflected in the census figure. Truman State University has 744 students listed other than white. They also have an additional 377 International students according to the 2018-2019 enrollment statistics. ATSU enrollment for the fall of 2018 has 167 students listed as non-white and 29 unknown. The majority of ATSU students, 99% come from outside of the Kirksville area. The City of Kirksville has seen a significant increase of families from the Democratic Republic of the Congo since the 2010 census report. As an example, the Kirksville RIII School District reports 112 students enrolled in K-12 for the 2018-2019 school year. Kirksville is located on one of the few major north-south highways (Highway 63) that services northern Missouri and southern Iowa. Kirksville is the largest city for miles and is the cultural/economic hub for a very large area. This explains the pool of those not counted in the city's census information.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Based on the 2010 Census for persons 16 years of age and older who designated a single race, the City of Ladue's African American residential population is 0.88, which registers as one of the lowest African American populations in the State of Missouri. Unfortunately, this is not a true reflection of the racial diversity represented in the City of Ladue on any given day. The transient or traveling population within Ladue is far different than the population of residents in Ladue. Ladue is home to several major thoroughfares, which are used to connect Ladue to people from all over St. Louis City, St. Louis County, and throughout Missouri. I-170 and US 64/40 both travel through Ladue, along with Clayton Road, Ladue Road, Warson Road, and McKnight Road which all carry high volumes of vehicles through Ladue on a daily basis. In addition, Lindbergh Boulevard is set just feet outside of Ladue's jurisdiction and provides access to the main thoroughfares of Ladue. Ladue is also home to several businesses to include high volume retail and grocery stores, multiple private and public schools, and a popular St. Louis County Park. Mention can also be made that two of St. Louis' shopping malls are placed on both the east and west borders of Ladue (St. Louis Galleria and Frontenac Plaza). It is obvious that the transient population represented daily in Ladue includes citizens from cities that touch the borders of Ladue and from areas throughout St. Louis City and County. The reported African-American populations in the cities that border Ladue are far greater than Ladue's 0.88 population. For example: Brentwood = 2.88 Richmond Heights = 11.25 Clayton = 8.84 Rock Hill = 23.42 Creve Coeur = 6.68 St. Louis County = 21.73 Frontenac = 2.35 State of Missouri = 10.90 Olivette = 24.13 University City = 40.12 Our concern is that the residential data traditionally used in the Vehicle Stop Report does not provide an accurate account of the diverse transient population that truly represents the diversity within the City of Ladue at any given time. There was a change on the 2020 Vehicle Stop Reports (Box 7) where the officer is now required to enter the zip code of the residence of the driver who was stopped. While we only have three months of reporting as of this writing, this change helps demonstrate our concern that the current reporting system, which focuses on residential population, is not a true reflection of the traveling or transient population driving in Ladue daily. For example, in January 2020, only 25 or 13.230% of our traffic stops were of residents, while 164 or 86.770% were of non-residents. In February 2020, only 27 or 11.690% of our traffic stops were of residents, while 204 or 88.310% were of non-residents. Finally, in March 2020, only 15 or 6.700% of our traffic stops were of residents, while 209 or 93.300% were of non-residents. We feel that the current system used to calculate the "disparity index" is flawed and it does not provide an

accurate representation of our department’s performance.

Lafayette County is approximately 670 square miles and is dissected by Interstate 70. Annually, our Deputies make numerous traffic stops on the Interstate. We also have US 24 Highway that runs completely across the Northern portion of Lafayette County. Our Deputies conduct traffic enforcement in this area as well. That said, in 2019, we stopped a lot of motorist that are not Lafayette County residents. These motorist are from all parts of the United States and are from a wide variety of race, nationality and age.

VEHICLE STOPS DATA 2019

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

2010 Pop. Disparity Index	N/A						
2018 Local population %	N/A						
2018 Pop. Disparity Index	N/A						
Search rate	2.97	1.09	6.79	0.00	0.00	0.00	0.00
Contraband hit rate	21.43	33.33	18.18	#Num!	#Num!	#Num!	#Num!
Arrest rate	1.91	1.09	3.70	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Contraband hit rate	7.63	7.63	#Num!	#Num!	#Num!	#Num!	#Num!
Arrest rate	3.76	3.83	0.00	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Due to the high number of vacationers from outside our jurisdiction that pass through the City of Laurie, traffic stops do escalate.

Arrest rate	5.45	5.10	18.75	5.56	0.00	100.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The demographic data used for the City of Lee's Summit is now ten years old and appears to be very inaccurate. For example, the data underrepresents the diversity of the population, reporting 7.59% African American residents while the school district reports 12.5% of students are African American. Lee's Summit is also a retail and employment destination, attracting residents from adjacent urban centers with much higher minority population percentages (25 – 40%) not reflected in the population data. The driving population statistics reflect traffic on major arterial roadways, such as I-470, M-291, US-50, and M-150. The highest statistically significant search rate shows for African Americans at 9.56, but is based upon 290 searches; 209 arrests were mandated by law from court issued warrants, further altering search data in that 206 of the 290 searches were legally required inventory or incident to arrest searches (individuals and vehicles taken into custody must be possessions inventoried). Subtracting warrant arrests reveals 81-84 searches not related to warrant arrests.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Search rate	5.56	4.17	8.33	#Num!	#Num!	#Num!	#Num!
Contraband hit rate	0.00	0.00	0.00	#Num!	#Num!	#Num!	#Num!
Arrest rate	0.00	0.00	0.00	#Num!	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The City of Lincoln is mostly Caucasian race, and what makes us different then a lot of other places in Missouri are the tourists that pass through. Lincoln sits right on Highway 65 and is a short drive from Truman Lake and Lake of the Ozarks. People from the Kansas City area Jefferson City area, other places drive through Lincoln to get to the lake, so in general if we do stop other races besides Caucasian it's because we are stopping people that do not live in the Lincoln City limits. This is what makes the City more diverse than most also this past year we participated in traffic grants which also made our traffic stops go up a little more than normal.

2018 Pop. Disparity Index	N/A	0.92					
Search rate	3.52	3.35	5.13	4.17	0.00	0.00	33.33
Contraband hit rate	18.75	21.43	0.00	0.00	#Num!	#Num!	0.00
Arrest rate	3.41	3.11	5.13	8.33	0.00	0.00	33.33

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

We have two major U.S. highways through our county. U.S. 36/I-72 runs from Chicago Illinois to Kansas City, MO. We have a huge amount of calls for service on this highway due to the large volume of traffic. This is a 4 land divided highway and where the vast majority of our traffic stops comes from. I for one most usually cannot tell the race or gender of the driver when I meet them on the highway until I have them stopped or are in close proximity behind them immediately prior to being stopped. Our deputies and I stop people who are violating traffic offenses and endangering the lives of everyone else on this highway. The Missouri State Highway Patrol here covers Livingston, Grundy and Mercer counties. There are very few troopers here which leaves us taking the many calls for service.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	5.42	4.41	8.09	8.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Manchester is unique in ways most municipalities in the West St. Louis County area are not. Manchester is approximately 5 square miles with two state highways (MO 141and MO 100) and a major county road (Big Bend Rd) passing through leading to Interstates 270, 44, 55, 40/61 and 70.

These four lane divided state highways intersect and provide essential routes for the traffic in and out of the city. This results in a large “transient” population travel through the city at all hours of the day. Manchester is also home to more than 300 small to mid-size businesses, large retail, manufacturers and corporate offices.

These distinctive elements contribute to the high volume of vehicle traffic in Manchester and are directly related to the total number of vehicles stopped and the Disparity Index values.

The City of Maplewood borders the City of St. Louis and has three heavily traveled thoroughfares within its city limits, which includes Manchester Rd., Hanley Rd. and Big Bend Blvd. The City of Maplewood has five hundred fifty-four businesses which includes a number of car dealerships, two major retail shopping centers and a vibrant downtown business district that is home to several restaurants, lounges, two breweries and various specialty shops. Maplewood-Richmond Heights High School is located within the Maplewood city limits. A high volume Missouri Department of Revenue Office is located within the Maplewood city limits. Sunnen Business Park & Products Company is located within the Maplewood city limits, as well as two MetroLink stations. The City of Maplewood and the Mid-County Chamber of Commerce hosts several community events throughout the year that draws large crowds of visitors to the City.

Arrest rate	4.85	4.41	0.00	100.00	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	9.13	8.59	12.07	17.46	18.60	6.25	5.56

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Contraband hit rate	25.00	25.00	#Num!	#Num!	#Num!	#Num!	#Num!
Arrest rate	4.62	3.39	#Num!	20.00	0.00	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	1.63	1.60	2.22	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	0.00	0.00	0.00	#Num!	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

2010 Local population %	N/A	90.80	4.62	2.98	0.36	0.30	0.94
2010 Pop. Disparity Index	N/A	0.99	0.89	1.75	0.44	0.00	0.34
2018 Local population %	N/A	88.93	4.54	3.87	0.22	0.65	1.78
2018 Pop. Disparity Index	N/A	1.01	0.90	1.35	0.72	0.00	0.18
Search rate	11.42	10.70	25.49	10.77	0.00	#Num!	50.00
Contraband hit rate	28.87	29.17	38.46	14.29	#Num!	#Num!	0.00
Arrest rate	8.29	8.03	13.73	7.69	0.00	#Num!	25.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	7.01	5.61	18.75	100.00	#Num!	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	3.57	3.30	4.30	0.00	#Num!	0.00	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The vehicle Stops Data for 2019 shows a 2018 disparity index of 1.25 for Black motorists and a 1.16 for Hispanic Motorists. Nodaway County has a population percentage of 3.14 % black and 1.52 Hispanic. Our county has Northwest Missouri State University that has a very diverse racial mix of students. Many of the students do not get counted in our local census. Additionally, pass through traffic of individuals traveling to Northwest to see different sporting events or other activities attracts a diverse population. We are between Kansas City, St. Joseph, and Omaha, NE that also adds to a skew in the results.

Noel Mo. is a small town in the South West corner of Mo. in McDonald County, we have several different Races as well as Cultures (approx. 30-35) and languages (approx. 14-16). We have a major production plant (Tyson Foods) within our City. We have travelers (whether business or pleasure) as well as vacationers that come to Noel as well as come through Noel, all the way from the surrounding States, from the entire US and other countries. We are a Tourism Town with 3 Campgrounds which can have a total of 7-8, 000 people or more in a given weekend or more, not including all the canoers that travel here. We also educate motorists on Mo. laws and why they are in place, not only to protect them but others as well. We are very proud of our City and our Citizens and want to keep them as well as our Travelers and Vacationers SAFE! which is one of our Main Goals!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

North Kansas City has a list of demographics that make it a challenge to discern meaningful data regarding racial profiling analysis. The city is only 4.5 square miles, with approximately 4,400 residents, however, 6 highways travel through the city limits carrying an estimated 200,000 vehicles a day. Furthermore, the City's daily workforce/daytime population is estimated at 35,000 people at over 1,100 businesses. There is no information regarding the race/sex make up of the daily motorists or the work force. Due to the small size of the department, and the unique "Urban Village" description, we are not able to compare individual officer's statistics with other officers working in a similar environment. We do constantly compare our stop data among our officers, and we also consider the Kansas City, Missouri census data (which surrounds our city limits on all sides) when we are determining the reasonableness of our statistics. The department relies on research conducted that included demographics from five miles in all directions (simulated city of 100 sq. miles), which resulted in Disparity Indexes closer to 1 in all categories.

Arrest rate	8.52	7.87	30.00	0.00	0.00	#Num!	11.11

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	5.21	5.00	10.53	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Concerning the 2019 vehicle stops data submitted by the Osage County Sheriff's Office, there are a few circumstances unique to Osage County that affect statistical analysis. Referencing the population information and breakdown derived from the 2010 Census, there a few categories that tend to be skewed. Osage County is proud to be the home of the State Technical College, which brings students from all around wanting to pursue education within the trade community. With attendance increasing every year, that brings students from a diverse background to our County. As such, there are occasions that members of the Sheriff's Office contact these students for traffic infractions, which is then factored into our reporting. Osage County has a significant stretch of Highway 50 running through, which is an alternative route from Kansas City to St. Louis. This is major corridor has motorists traveling to and from these major metropolitan areas. With Deputies enforcing traffic laws on Highway 50, this leads to contact with citizens outside of Osage County that are simply passing through, and often coming from and traveling to communities with greater diversity. When examining the statistical breakdown of the report submitted by the Osage County Sheriff's Office and factoring in the aforementioned circumstances unique to our county, stops conducted on minorities is low. In addition to the relatively small of stops, the rate of search is even lower.

Arrest rate	0.00	0.00	0.00	0.00	0.00	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Contraband hit rate	35.60	36.22	50.00	0.00	0.00	0.00	0.00
Arrest rate	7.59	7.78	3.70	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	6.00	5.49	9.47	19.57	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

2018 Pop. Disparity Index	N/A	1.00	2.48	0.20			0.32
Search rate	10.41	10.05	18.18	0.00	0.00	25.00	9.09
Contraband hit rate	39.32	38.10	60.00	#Num!	#Num!	0.00	0.00
Arrest rate	6.94	6.60	14.55	0.00	0.00	0.00	9.09

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	7.14	7.14	#Num!	#Num!	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The Platte County Sheriff's Office provides patrol and traffic enforcement services in an area that includes multiple major interstate corridors, a large shopping and entertainment district, casino, many hotels, and the Kansas City International Airport. It is bordered by Kansas City, KS, Kansas City, MO, and Leavenworth, KS, with minority populations of 42.1%, 39.9% and 25.1%, respectively. It should be noted that 67% of all traffic stops in 2019 by Platte County personnel were reported as nonresident drivers. Although the racial makeup of all of the nonresident drivers traveling Platte County roadways is unknown, it is unlikely to accurately reflect the racial and ethnic makeup of the county's population. The Platte County Sheriff's Office prohibits racial profiling by policy, and is committed to ensuring impartial public safety service to the public regardless of race, age, gender or other factors. Officers receive annual racial and cultural sensitivity training and the Sheriff's Office maintains accountability through the racial profiling reporting process in compliance with Missouri State Statute.

Contraband hit rate	63.33	62.07	#Num!	100.00	#Num!	#Num!	#Num!
Arrest rate	8.82	9.12	0.00	0.00	0.00	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	4.20	4.24	1.72	20.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Not included in this report is one of the most important metrics in evaluating its findings: the number of stops of residents vs non-residents. 981 of our stops were of non-residents due to having two, four-lane, and US highways in our jurisdiction. The disparity index is calculated solely on the racial-breakdown of residents who live in Ralls County, but because only 36% of our stops involved residents of Ralls County, the disparity index value presented is invalid. The actual number of Black motorists stopped who are also Ralls County residents was 13 out of the 548 total stops of in-county residents (2.37%). Dividing that by the 2018 population density would give us a disparity index of 1.47 rather than 4.91. Disparity indexes for other races were similarly skewed. Since comparing the number of stops against even statewide population density would not be accurate due to the number of out-of-state motorists that pass through our community, looking generally at the breakdown of white versus non-white motorists shows that only 11% of our total number of stops are of motorists who are non-white which we feel is reasonable evidence that our agency does not use race as a pre-text for vehicle stops.

The population and demographics reported from the 2010 census are not an accurate representation of our growing and diversifying community. The Raymore Development Services Director supplied the official population estimate of 21,784 as of July 1, 2018. This number is provided to the City each May for the previous year by the U.S. Census Bureau and is not available when our response is due to the AGO. In the latest report, we observed the addition of the 2018 Local Population Percentage and Disparity. Unfortunately, there is no change in the population over 16, which is still listed at 14,300. Without knowing what population was used for 2018, it is impossible to determine how the percentage and disparity were reached. As a clean and safe community with good schools, Raymore is a highly desirable location to move. According to the “American Community Survey” provided by the Census Bureau, Raymore ranked #5 in growth rate (+12.95%) from 2018 to 2019 of all Missouri cities with a population over 20,000. In 2019, Raymore issued 113 permits for new single family homes and 26 permits for duplex units. The number of new single family homes in 2018 was 145, 2017 was 200, and 2016 was 199. Economic development continued to increase in Raymore and surrounding communities, with the addition of big box stores, restaurants and other retail venues drawing a transient and diverse customer base to the area. A large retail store remains the highest call and arrest location in Raymore. This store is one of the only 24-hour operations of this type found in southern metropolitan Kansas City. It is co-located with a large wholesale store that moved to Raymore from a more urban community, drawing greater diversity of consumers. The number of traffic stops increased significantly from 4,953 in 2018 to 6,268 in 2019 for a 26.5% increase, which may be attributed to modest improvements in staffing.

Arrest rate	9.94	7.73	11.80	6.90	0.00	33.33	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	7.19	7.47	0.00	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

There continues to be flaws with the disparity index used by the Attorney General's office that remain unaddressed. First, the AG's Office uses US Census Data to determine the population of each city. Thus, the data set is now ten years old. Second, this analysis assumes that every person 16 years of age or older actually drives. Third, the analysis assumes that the races of the population and their numbers remain the same 24 hours a day. With two major interstates, a shopping mall and significant retail district, our daytime population increases by the tens of thousands. Obviously, motorists other than Richmond Heights residents drive on our streets and highways. However, this flawed disparity index uses only the population data for individual cities and not a more realistic regional population count. Fourth and most significant is that this disparity index assumes that motorists of a particular race must be involved in a vehicle stop at the exact ratio of their representation in the population. There is no study to support his assumption.

Arrest rate	16.57	12.07	28.60	15.38	8.33	50.00	5.26

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The Riverside Police Department, by policy and practice, prohibits racial profiling. Some factors dramatically increase the driving population above Riverside's cited driver-eligible population. Those factors include a daytime population which grows by 87%; the presence of a riverboat casino; bordering on two major metropolitan cities (Kansas City, MO and Kansas City, KS); and state and federal highway routes traveling through the City with a daily traffic count approaching 300,000 vehicles.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	7.53	5.81	16.13	12.12	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	2.59	2.22	5.00	25.00	0.00		0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Schuyler County conducted 347 total traffic stops in 2019. Of those, 89 were of local residents. Schuyler County is the second smallest county in the state. According to the 2010 census, 3500 are licensed drivers. With such a low number of licensed drivers and the fact we have 2 US Highways going through the county, our numbers are going to show we stop more drivers outside of our jurisdiction. Schuyler County also had a big windmill project start toward the end of 2019. There are approximately 400 workers for this project who do not live in Schuyler County that travel here daily

2010 Local population %	N/A	85.45	5.01	6.96	0.86	0.42	1.31
2010 Pop. Disparity Index	N/A	0.97	1.75	0.93	0.40	0.07	1.01
2018 Local population %	N/A	81.83	5.56	8.01	0.62	0.20	3.78
2018 Pop. Disparity Index	N/A	1.02	1.57	0.81	0.56	0.16	0.35
Search rate	14.75	14.17	19.75	16.67	18.18	50.00	7.06
Contraband hit rate	30.87	31.79	30.63	17.39	75.00	0.00	50.00
Arrest rate	9.57	8.33	16.19	16.67	27.27	0.00	4.71

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	5.43	5.43	#Num!	#Num!	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	7.00	5.71	8.85	9.52	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	3.98	4.06	0.00	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	12.53	8.64	14.61	14.44	6.06	0.00	3.64

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	7.69	7.17	9.48	8.14	1.20	0.00	1.87

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	2.12	2.17	0.00	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The primary reason for our reported data of African American stops being disproportionate to our resident percentages is that we have more than 18,000 additional commuters traveling through St. John on any given day. We have one of the largest grocery stores in close proximity to the City of St. Louis located in St. John on St. Charles Rock Road.

In 2019 various strategies were used related to prevention, education, community interaction, and enforcement. Strategies involved multiple agencies to include aircraft support in combating local crime that resulted in additional contacts in those areas experiencing the greatest impact from criminal activity. By the end of 2019 we had an 8.5% drop in Part I crime, while we experienced a 12.2% increase in motor vehicle theft. Our disparity index decreased for black drivers (1.8) and increased for white drivers to (1.01). We continue to closely monitor contacts with close attention to discretionary aspects of traffic stops, and address implicit and explicit bias through training, internal analysis, supervision, and transparency. We are committed to promoting fair and impartial policing practices, our enforcement activities are based on behavior, with the added check and balance of the court system.

The City of St. Louis is approximately 62 square miles and lies at the core of the largest metropolitan area in the state. The City is comprised of 79 diverse neighborhoods and 108 City parks and is home to a world-renowned zoo and botanical garden as well as other major museums and arts and entertainment attractions. The City hosts every home game for two major sports franchises and one Division I university, a multitude of concerts and theatrical performances at numerous venues, and a set of large regional cultural events including one of the largest multi-day Independence Day festivals in the country, and the second-largest Mardi Gras celebration in the country. As the urban core of the metropolitan area, the City's estimated daily population grows by approximately 34% , drawing from all surrounding cities and counties within the metropolitan statistical area. In addition, regional daily commuting patterns bring residents from throughout the region, as well as citizens from outside the region, into the City limits. While the data compiled in this report are informative, it is important to note that disparity indices represent ratios based simply on resident population and do not take into consideration regional population, commuting patterns, or factors intrinsically associated with providing law enforcement services citywide or within localized pieces of City geography. As a result, a disparity rate alone does not serve as proof, or necessarily even an indication, of the existence of racially based profiling. Department policy prohibits bias-based policing and officers are expected to adhere to this policy. Every commissioned member of the Department receives annual training on procedural justice that addresses bias-based policing, as required both by State law and by Department policy. This training is supplemented and reinforced by periodic courses in related topics such as cultural diversity, ethics, and communication skills. The Department continues to work with its officers, local leaders, and community and academic partners to identify best practices as they relate to citizen contacts.

VEHICLE STOPS DATA 2019

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The data presented in this report provides a summary of stop data and a rudimentary overview of traffic stop disparity in St. Louis County, but should not be used to draw meaningful conclusions about racial profiling. The disparity index calculated uses census data as a benchmark. Census data does not account for the diverse population traveling throughout the county's 523 square miles on its 3,100 lane-miles of roadway. St. Louis County is not only the state's largest population center with approximately one-sixth of the state's population, but it is also a significant travel, employment, and educational center. Six major interstate highways converge within the county, and according to a 2013 Missouri Department of Transportation study, St. Louis County has the highest average annual daily traffic counts in the region, with some portions of the interstate accommodating as many as 200,000 vehicles per day. St. Louis County is home to more than 20 institutions of higher education, eight major malls, and countless shopping plazas employing one-fourth of the state's workforce. As a major employer, commercial and educational center, St. Louis County not only attracts residents from the surrounding counties but outlying counties in this state and the state of Illinois. For all these reasons, using census data as a benchmark cannot provide an accurate measure of the driving population in St. Louis County. Conclusions about disparity or racial profiling drawn from a census benchmark method are problematic. More in-depth research with advanced techniques should be used to discover meaningful results. The stop data the St. Louis County Police Department collects is helpful in presenting a preliminary picture of the population traveling through and within the county on a yearly basis. However, the demographic statistics of St. Louis County's residential populations, provided by the 2010 Census, does not account for the diverse population traveling throughout the county's 523 square miles on its 3,100 lane miles of roadway. St. Louis County is not only the state's largest population center with approximately one-sixth of the state's population, it is also a major travel, employment, and educational center. Five major interstate highways converge within the county, which is the heart of the greater St. Louis Metropolitan Area (comprised of eight counties across two states). According to a 2013 Missouri Department of Transportation study, St. Louis County has the highest average annual daily traffic numbers in the region, with some portions of the interstate accommodating as many as 200,000 vehicles per day. In a state that serves as a major transportation crossroads for the entire nation, St. Louis County is a significant transportation hub for the state. St. Louis County is home to more than 20 institutions of higher education, eight major malls, and countless shopping plazas. One-fourth of the state's workforce is employed within the county. As a major

commercial and educational center, St. Louis County not only attracts residents from the surrounding counties, but outlying counties in this state and the state of Illinois. For all these reasons and more, the population of people traveling throughout the county cannot solely be based on the demographics of its residents alone. Despite the higher than average diversity traveling through St. Louis County the St. Louis County Police Department frequently records disparity indices lower than the state's average. In 2015, our Department received 295,115 calls for service; officers made 16,918 full-custody arrests and 56,790 traffic stops with only four complaints of biased based profiling. All of the complaints were unfounded. Of the total number of stops in 2015, officers only knew the race of 4,972 drivers, or approximately 8.8%, prior to initiating their stop.

Arrest rate	6.47	6.12	10.08	5.41	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	5.64	5.88	0.00	0.00	#Num!	#Num!	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	13.17	12.61	15.38	14.29	#Num!	100.00	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

In response to your email, it is correct that Sunrise Beach has an amount of large tourist traffic that comes through each season and that definitely skews our numbers to look like there are more people from out of the area in our numbers. Studies have shown that our population increases 3-5 times in the spring summer months with people visiting their vacation homes. Also since we are on a major highway with Hwy 5 being the only major North/South highway through the area. We get lots of passing through traffic daily.

Arrest rate	4.08	3.82	7.69	0.00	#Num!	0.00	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

In recent years, there was been a higher fluctuation in transient workers working for the various contractors involved in the recent wind turbine projects in the and around Atchison County area. NWMSU is also east of us in Maryville, Mo., whereas Interstate 29 is to the west and traffic to and from is seen passing through our city.

The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The disparity index is based upon the population demographics of the City of Town and Country, which has a population of approximately 11,000 people with an African American population of 2.69 percent. This does not accurately reflect the demographics of the true motoring population through Town and Country daily. Every weekday, nearly 400,000 motorists travel through our city limits on the second most voluminous interchange in the State of Missouri (Interstates 64/40 and 270). Our motoring public is more reflective of the demographics of this state and St. Louis County, which are comprised of African American populations of 10.9 and 19 percent respectively. The traffic stop data for Town and Country Police Officers indicate that the majority of Town and Country traffic stops occurred on the interstates. The natural implication of this statistic is that the ratio of the race of motorists stopped for violations would reflect state and county demographics, not the residential population of the City of Town and Country.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

2010 Pop. Disparity Index	N/A						
2018 Local population %	N/A						
2018 Pop. Disparity Index	N/A						0.00
Search rate	2.26	2.36	2.70	0.00	0.00	0.00	#Num!
Contraband hit rate	57.14	50.00	100.00	#Num!	#Num!	#Num!	#Num!
Arrest rate	2.26	1.97	5.41	0.00	0.00	0.00	#Num!

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	3.01	1.35	3.94	2.33	0.00	0.00	0.88

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

2010 Local population %	N/A	91.66	2.86	2.61	0.20	0.75	1.91
2010 Pop. Disparity Index	N/A	1.05	0.97	0.30	0.77	0.00	0.08
2018 Local population %	N/A	87.43	2.96	6.75	0.00	0.00	2.87
2018 Pop. Disparity Index	N/A	1.10	0.94	0.11			0.05
Search rate	4.48	4.17	16.67	0.00	0.00	#Num!	0.00
Contraband hit rate	24.14	23.08	33.33	#Num!	#Num!	#Num!	#Num!
Arrest rate	2.93	2.73	5.56	20.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

At first glance, the Vinita Park Police Department's (MO0957700) racial profiling and traffic stop statistics may appear to be unbalanced as compared to the population size of the City of Vinita Park, which was calculated at 1869 in 2017. However, there are reasons why the Vinita Park Police Department conducted over 11,000 traffic stops in 2019. First and foremost, the Vinita Park Police Department, also known as the North County Police Cooperative (NCPC), is a CALEA accredited law enforcement organization that provides police services for not only the city of Vinita Park, but six (6) other municipalities in St. Louis County. Police services are contracted through the city of Vinita Park (NCPC) by the cities of Dellwood, Pine Lawn, Wellston, Uplands Park, Beverly Hills and Velda Village Hills. Police services are provided to nearly 15,000 residents within an approximate four (4) square mile area in the above listed cities. Five (5) of the seven (7) cities are almost contiguous with each other. Additionally, according to the demographical make-up of all cities combined who receive police services from our organization, 86% of the combined population is African American. Lastly, all traffic stop data, racial profiling data, uniformed crime reporting, etc. are tallied under one ORI (Vinita Park Police Department). Please refer to the below chart and graph for further detail.

VEHICLE STOPS DATA 2019

Walnut Grove Police Dept.

2010 Population: 511

age 16 and over

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other

Arrests	18	16	1	1	0	0	0
Statewide population %	N/A	82.76	10.90	2.94	1.71	0.41	1.28
2010 Local population %	N/A	97.26	0.20	0.78	0.00	1.17	0.59
2010 Pop. Disparity Index	N/A	0.98	7.88	2.96	#Num!	0.00	0.88
2018 Local population %	N/A	97.24	0.00	0.99	0.00	0.59	1.18
2018 Pop. Disparity Index	N/A	0.98		2.35		0.00	0.43
Search rate	9.00	8.87	16.67	11.11	#Num!	#Num!	0.00
Contraband hit rate	25.71	27.27	0.00	0.00	#Num!	#Num!	#Num!
Arrest rate	4.63	4.30	16.67	11.11	#Num!	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100. #Error indicates zero denominator.

2010 Local population %	N/A						
2010 Pop. Disparity Index	N/A						
2018 Local population %	N/A						
2018 Pop. Disparity Index	N/A			0.00		0.00	
Search rate	0.00	0.00	0.00	#Num!	0.00	#Num!	0.00
Contraband hit rate	#Num!	#Num!	#Num!	#Num!	#Num!	#Num!	#Num!
Arrest rate	0.00	0.00	0.00	#Num!	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

In regards to the racial profiling data, it should be noted that the estimated population from the 2010 Census is 4,830. According to the United States Census Bureau the estimated population of Waynesville as of, 2017 is 5,226. The City of Waynesville includes Waynesville Regional Airport at Forney Field, providing the community with air service. Although it is on Fort Leonard Wood, it is jointly run by the cities of Waynesville and Saint Robert and is available for civilian and commercial service. The major east-west routes through Waynesville are Interstate 44: before that, the main highway was US Route 66, which still exists as a scenic route through the entirety of Waynesville and also passes through the Devil's Elbow, St. Robert, Buckhorn, and Hazelgreen. The major north-south routes near Waynesville are: Route 17 which crosses Interstate 44 at exit 153 at Buckhorn, runs east through Waynesville, turns north to Crocker, and then runs north out of the county to Iberia. South of Interstate 44, Highway 17 hugs the western edge of Fort Leonard Wood, passes near Laquey, and circles south of the post until it runs out of the county and joins Highway 32 in Roby. Highway T which runs north from Highway 17 at Waynesville to Swedeborg, where it meets and ends at Highway 133 between Richland and Crocker. Major attractions along US Route 66 include: the Old Stagecoach Stop, which is now a museum but began as a tavern and boarding house and is the oldest standing structure in the county. The Old Courthouse Museum in downtown is near the Old Stagecoach Stop. Seven main school districts are fully or partially within the borders of Pulaski County, not counting two small districts which are mostly within other counties and only have a few dozen residents within Pulaski County. All seven school districts have a high percentage of Fort Leonard Wood military dependents, and over two-thirds of Waynesville students fall into that category. The cities of Waynesville, St. Robert and Fort Leonard Wood along with their surrounding rural areas running east to Devil's Elbow, are served by the Waynesville R-VI School District which is by far the largest in the county. There are currently 5830 students and 1,049 staff members at the school on a daily basis. The City of Waynesville borders Fort Leonard Wood and is the main entry to Fort Leonard Woods West Gate. Fort Leonard Wood is a census designated place (CDP) in Pulaski County, Missouri, United States. The Population per the United States Census Bureau was 15,061 at the 2010 census. The racial makeup of the CDP as of July 1,2019 (V2019) was 62.6% White alone, 19.2% Black or African American alone, 1.8% American Indian, 3.9% Asian alone, 0.9% Hawaiian or Pacific Islander, Hispanic or Latino of any race were 18.6% of the population. These statistics do not include two or more race percent and, white alone not Hispanic or Latino as Hispanics may be of any race, so are included in all race categories

(as per the United States Census Bureau). I believe all of the information presented may provide additional information in order to clarify the data and provide a more accurate reflection of the demographics of our driving population. I hope this information will improve our ability to provide a more balanced report to the public.

Arrest rate	1.88	1.52	4.00	3.13	0.00	0.00	14.29

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

2018 Pop. Disparity Index	N/A	0.74	28.88		0.58		2.98
Search rate	5.66	4.23	11.00	0.00	0.00	0.00	0.00
Contraband hit rate	37.50	42.31	31.82	#Num!	#Num!	#Num!	#Num!
Arrest rate	4.83	3.09	11.00	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

The City of Weldon Spring contracts annually with St. Charles County Police Department to provide regular and dedicated police protection and patrol services. The City has no direct managerial control over the St. Charles County Police Dept. from an operational or procedural standpoint. Weldon Spring is bordered on two sides with major highways which carry thousands of vehicles per day. Interstate 64 on our southwestern border, which is one of four major highway connections to Saint Louis County and State Route 94 on our northern border running roughly east to west. Though Weldon Spring's population is relatively small, consisting of 5,443 residents per the 2010 US Census, the community's daytime population for just employment figures
essentially matches this figure with roughly 6,000 jobs in a variety of employment sectors. Weldon Spring has two major employment centers: Verizon Wireless Campus and Enterprise Holdings Campus and is also adjacent to the Missouri Research park which has numerous large employers such as Zoltek and Nike Air MI. These and other businesses employ people from throughout the St. Louis Metropolitan Area. Weldon Spring is also home to CenterPointe Hospital, a medical care facility specializing in psychiatric/behavioral and substance abuse issues and conditions. It is approximately a 125-bed facility which provides both in-patient and out-patient services to the entire region. In closing, Weldon Spring is a small bedroom community located a short 32-minute drive from downtown St. Louis and nestled in a suburban environment. Given the highway and employment centers located in and around Weldon Spring, it is understandable that a diverse population will traverse the community for a variety of reasons especially considering our centralized location within the St. Louis Metro

Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

After a review of the submitted report we found that the report is accurate. The only comment I can make on the numbers is that US Highway 63 passes through the City of west Plains and a large amount of traffic tickets issued were individuals travelling on US Highway 63, many of which are from outside our area. As you can see in the report that 508 of the 688 traffic stops were initiated on the US 63 Highway exchange. Twenty-nine of those were black and that was out of a total of 36 total stops involving a black motorist. I would suspect a good number of those involved individuals travelling through the City on Highway 63 that committed traffic offenses within the City of West Plains.

Arrest rate	2.12	2.19	3.03	0.00	0.00	#Num!	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

Arrest rate	4.61	4.22	6.59	10.31	0.00	12.50	2.63

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. 2018 Disparity index is based on 2014-2018 average population estimates from the U.S. Census Bureau's American Community Survey (ACS). The ACS only provides race-specific Hispanic estimates for White, meaning non-White Hispanic residents are double-counted in the 2018 race percentages above. While the 2010 disparity index is the default metric, if this jurisdiction has a small non-white Hispanic population, the 2018 disparity index may provide more current information.

Disparity index = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation.

Search rate = (searches / stops) X 100.

Contraband hit rate = (searches with contraband found / total searches) X 100.

Arrest rate = (arrests / stops) X 100.

#Error indicates zero denominator.

AGENCY	White	Black	Hispanic	Asian	Am Indian	Other

Notes: Proportion of stops by racial category/proportion of statewide population of that racial category. A value of 1 indicates local stops within a racial category equivalent to that racial groups proportion in the state population. A value less than 1.0 indicates a lower proportion of stops of that racial group lower than its proportion in the state population. A value greater than 1.0 indicates a higher proportion of that racial group than its proportion of the statewide population.

Appendix C:
Resident and Non-Resident Driver Disparity Index Scores

Adair County Sheriff's Dept.

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops of all drivers							
Stops	664	587	36	26	7	1	7
2010 Local Population %	100.00%	92.95	1.61	1.92	1.98	0.25	1.29
Disparity index all stops	---	0.95	3.36	2.04	0.53	0.60	0.82
Stops involving only jurisdiction residents							
Stops	276	244	20	7	2	0	3
Percent of all stops	41.57	41.57	55.56	26.92	28.57	0.00	42.86
2010 Disparity index for jurisdiction residents only	---	0.95	4.50	1.32	0.37	0.00	0.85
Stops involving only non-residents							
Stops	388	343	16	19	5	1	4
Percent of all stops	58.43	58.43	44.44	73.08	71.43	100.00	57.14
2010 Disparity index for jurisdiction residents only	---	0.95	2.56	2.55	0.65	1.03	0.80

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. **Disparity index** = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation. #Error indicates zero denominator.

Resident and Non-Resident Driver Disparity Index Scores

Lincoln County Sheriff's Dept.

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops of all drivers							
Stops	4,843	4,475	240	78	7	6	37
2010 Local Population %	100.00%	94.87	1.86	1.53	0.35	0.32	1.07
Disparity index all stops	---	0.97	2.66	1.05	0.41	0.39	0.72
Stops involving only jurisdiction residents							
Stops	3,893	3,702	138	20	3	2	28
Percent of all stops	80.38	82.73	57.50	25.64	42.86	33.33	75.68
2010 Disparity index for jurisdiction residents only	---	1.00	1.90	0.34	0.22	0.16	0.67
Stops involving only non-residents							
Stops	950	773	102	58	4	4	9
Percent of all stops	19.62	17.27	42.50	74.36	57.14	66.67	24.32
2010 Disparity index for jurisdiction residents only	---	0.86	5.77	4.00	1.19	1.33	0.89

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. **Disparity index** = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation. #Error indicates zero denominator.

2010 Disparity index for jurisdiction residents only	---	1.04		0.59	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. **Disparity index** = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation. #Error indicates zero denominator.

Resident and Non-Resident Driver Disparity Index Scores

Worth County Sheriff's Dept.

KEY INDICATORS	Total	White	Black	Hispanic	Asian	Am. Indian	Other
Stops of all drivers							
Stops	137	137	0	0	0	0	0
2010 Local Population %	100.00%	98.09	0.28	0.79	0.28	0.17	0.39
Disparity index all stops	---	1.02	0.00	0.00	0.00	0.00	0.00
Stops involving only jurisdiction residents							
Stops	83	83	0	0	0	0	0
Percent of all stops	60.58	60.58					
2010 Disparity index for jurisdiction residents only	---	1.02	0.00	0.00	0.00	0.00	0.00
Stops involving only non-residents							
Stops	54	54	0	0	0	0	0
Percent of all stops	39.42	39.42					
2010 Disparity index for jurisdiction residents only	---	1.02	0.00	0.00	0.00	0.00	0.00

Notes: 2010 Disparity index is based on population figures from the 2010 Census for persons 16 years of age and older who designated a single race. Hispanics may be of any race. Other includes persons of mixed or unknown race. **Disparity index** = (proportion of stops / proportion of population). A value of 1 represents no disparity; values greater than 1 indicate over-representation, values less than 1 indicate under-representation. #Error indicates zero denominator.
